

Crime Analysis and Crime Mapping Information Clearinghouse

This information clearinghouse is provided by the Police Foundation and the Office of Community Oriented Policing Services (COPS) as part of Grant #97-CN-WX-0005, "The Police Foundation Crime Mapping Laboratory: Enhancing Community Policing and Problem Solving Through Computer Mapping." The clearinghouse provides a comprehensive list of valuable crime analysis and crime mapping resources. This document includes bibliographic and Internet resources that may be useful to practitioners and researchers interested in the disciplines of crime analysis and crime mapping. The bibliographic references are composed of books and articles from academic journals that relate to topics such as crime analysis, cartography, geographic information systems, crime mapping, and Internet mapping. The Internet resources provided at the end of the document include links to law enforcement agencies that have received funding from the COPS Office as well as links to additional sources of information concerning crime analysis and crime mapping. Although every effort has been made to ensure that this guide is comprehensive, it was not possible to include every bibliographic and Internet resource. Therefore, only those resources deemed most relevant by the staff of the Crime Mapping Laboratory have been included. In addition, it should be noted that inclusion of crime analysis and crime mapping software resources does not imply an endorsement or recommendation for any particular product by the Police Foundation or the COPS Office.

The [Table of Contents](#) below includes hyperlinks to the rest of the document. By simply clicking on a topic of interest in the Table of Contents, the user will be taken to that particular section of the document. Since this document is approximately 30 pages long, users may wish to highlight a section that they would like to print. Otherwise, the entire document will be printed if users select *Print* from the *File* menu.

Table of Contents

I. Bibliographic References

- ◆ [Crime Analysis](#)
